PETUNYA

Su bizi besleyen yaşam
kaynağımızdır. Suyun
doğasında varolduğu gibi
Petunya Banyo Takımı
da kendine özgü akıcı
çizgiler taşımaktadır.
Kusursuz biçimde
yaratılan bir objenin aynı
zamanda fonksiyonel
anlamlar da
taşıyabileceğinin bir
kanıtıdır.

ENA

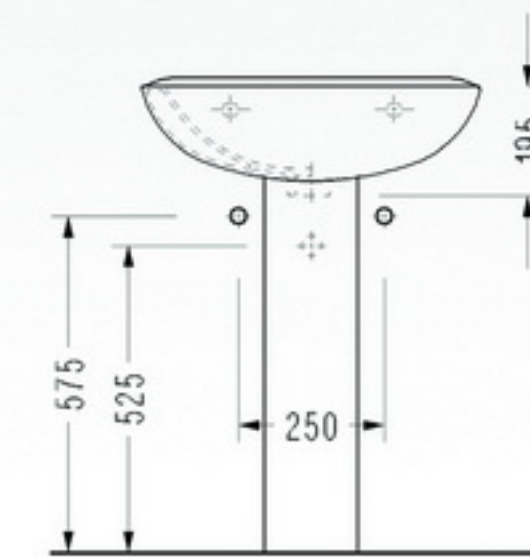

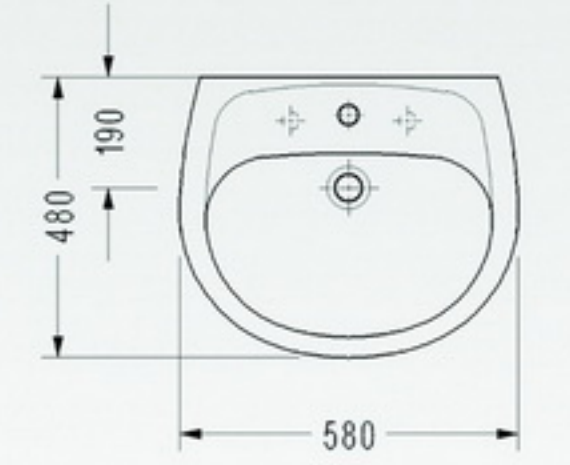

Kalite, her zaman pahalı
ve ulaşılmaz değildir. Ena
serisi bunun en güzel
örneğidir...

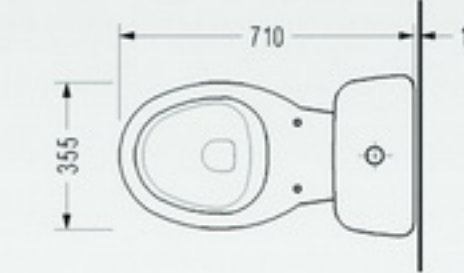

SARDES

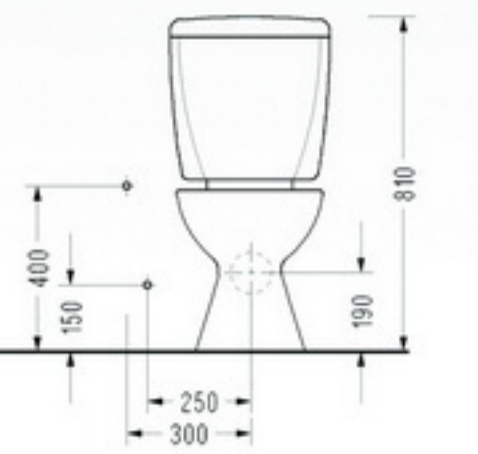

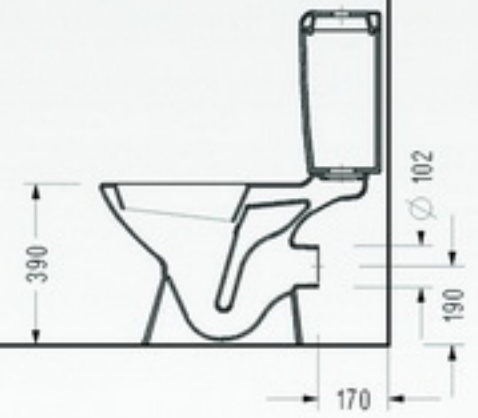

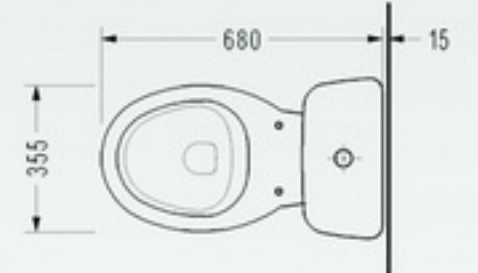

Tipik bir endüstriyel objenin en önemli özelliklerinden biri ulaşılabilirliktir. Bu; tanım olarak herhangi bir yerde ve zamanda temel ihtiyaçları karşılamak üzere varolmak anlamını taşımaktadır. sardes Banyo Takımı bu anlayışın en iyi örneklerinden biridir.

GARANTİ

SEREL EXTRA CLEAN

"Sağlık Gereçleri / sanitaryware" jenerik ismi ile günlük hayatta kullandığımız lavabo, klozet, helataşı vb. mamuller teknoloji olarak vitrifiye seramik olarak üretilir.

Vitrifiye seramiklerin sağlam, uzun ömürlü ve genel anlamı ile hijyenik olmaları üreticinin teknolojisinde vitrifikasyon derecesi ve seramik killeri içinde bulunan çeşitli metal oksitlerin kompozisyonlarının ayarlanması ile düzenlenir.

SEREL; uzun ömürlü, sağlam ve hijyenik ürünlerini yıllardan beri, yüksek sıcaklık vitrifikasyonu ve yüksek mukavemetli oksit harmanlama teknolojisi ile sürdürmektedir.

Japonya'da geliştirilen ve sonrasında dünya çapında uygulamaya geçirilen "yüzey" teknolojisini ile vitrifiye seramik sağlık gereçlerinde yeni bir aşamaya ulaşılmıştır. Serel'in de geliştirdiği ve "Extraclean" adı ile piyasaya sürdüğü bu yeni yüzey teknolojisini silikon gibi yüzeyaktif organometalik geçici kaplamalardan daha farklı ve kalıcı özellikler göstermektedir.

Daldırma ve/veya püskürtme metodları ile uygulanan silikon kaplamaları, seramik yüzeylere "hidrofob /su itir" özellik kazandırmakla beraber, günlük-haftalık ev temizlikleri ile birkaç ayda kalıcılığını ve özelliğini yitirmektedir.

SEREL bu teknolojiyi bilmesine rağmen geleneksel kalite anlayışından ötürü piyasaya silikonlu ürün çıkarmamıştır.

Gerek Japon ve gerekse SEREL "Extraclean" teknolojisini bir kaplama olmayıp sıran bizzat kendisine kazandırılan bir özelliktir. Teşbihte hata olmaz diyerek, silikon kaplanan mamulleri "tırnak boyası" na benzetirsek, SEREL Extraclean mamulleri "tırnağın kendisi" olmaktadır.

Nanoteknoloji olarak da son yıllarda kullanılan bir deyimle seramik sıran bizzat içinde katı hal kimyasında "spinel" olarak adlandırılan yapı oluşmakta, bunlar "nano" büyüklükte partiküller olarak iyonik bağlarla bünnyeye bağlanmakta ve bu şekilde iyon teknolojisi oluşturulmaktadır. Oluşan yüzey hidrofob ve hidrofilik özellikleri beraberce gösterip, yabancı maddeleri üstünde tutmamaktadır.

Örneğin yanmış motor yağı sulu emülsiyonları, metilen mavisi, malahit yeşili, normal kurşunkalem gibi en şiddetli ve yoğun kirleticiler su ve/veya bezle "Extraclean" yüzeyden kolaylıkla çıkabilmektedir.

Ancak japon zıncı, zıncı yağlıboya, cam kalemi gibi içinde yapışkan reçine bulunan zıncı-tutkalı malzemelerin extraclean yüzeye tutunması normal karşılanmalıdır. Burada "Extraclean" çok temiz anlamda kullanılmış olup, üzerine hiçbir şey yapışmaz anlamına gelmemektedir.

Serel "Extraclean"ın yüzeyinde yağ ve kir barındırmamasının getirdiği bir başka olumlu özellik bakteri-mantar-küf gibi mikroorganizmalara uygun yaşam ortamı oluşturmaması ile gelen ekstra hijyendir. Bilindiği gibi bakteriler de her mikroskobik canlı gibi;

- Beslenme,
- Yerleşme,
- Konfor amacı ile barınır ve bunları buldukları zaman da çoğalmaya başlarlar.

Serel"Extraclean" yüzeyinde kir tutmamayarak;

- Bakteri beslenmesini mikroskobik gözenek taşımasını ile ,
- Bakteri yerleşimini, kaygan oluşu ve su-nem tutmaması ile
- Bakteri konforunu ortadan kaldırmakta böylelikle bakteriler Serel "Extraclean" yüzeylerde üreyememektedirler.

"Hijyen" sağlık kurallarına uygun temizlik,

"Sterilizasyon" ise her tür mikroorganizmanın ortadan kaldırılması anlamlarını taşır.

Anti-bakteriyel terimi ise gevşek anlamlı bir tanım olup bilimsel tartışmalara açık bir kavramdır. Bu anlam içinde Serel "Extraclean" bakterilerinin üreme koşullarını ortadan kaldırdığı için bakteri-karşıtı "anti-bakteriyel" bir ürün olup, bu arada çevreye toksik etkiler yaymayan "çevre dostu" bir üründür.

Bilindiği gibi hipoklorit, tuzruhu gibi temizlik malzemelerinin kullanımı Avrupa'nın bir çok ülkesinde doğal çevreye ve sağlık dostu mikroorganizmalara verdikleri toksik etkiler, atık su tesislerine verdikleri zararlar nedenleri ile yasaklanmıştır. Serel "Extraclean" yüzey temizliğinde bu temizlik malzemelerine ihtiyaç göstermemesi nedeni ile de çevre dostu "Yeşil" sıfatlı bir üründür. Seramik sağlık gereçlerinin en büyük özelliği şüphesiz uzun ömürlü ve kalıcı güzellikte uzun yıllar hizmet vermeleridir. Bu nedenle Serel "Extraclean" yüzeyler çok sert testlerden geçirilmiştir.

Fabrikada özel bir test cihazı ile "Extraclean" yüzeyler 51.600 defa en korozif kirleticilerle kirlenilip, bir o kadar da su jeti ile temizlenmiştir. Aynı test cihazında yapılan testlerde, normal vitrifiye ürün sıraları 20.000 dönüde tuz ruhu, hidroklorik asit (HCL) ile bile temizlenememiş buna karşın "Extraclean" teknolojik yüzeyler ilk günkü sağlamlık ve temizlik özelliklerini göstermiştir.

Serel Extraclean mamullerinde yapılan 51.600 dönümlük test, bir lavabonun günde 10 defa testlerdeki korozif kirleticilerle kullanıldığı varsayımıyla, 14.14 yıl ömre tekabül etmesi demektir.

SEREL, Serel "Extraclean" ürünlerine 10 yıl garanti vermektedir.
